FOR IMMEDIATE RELEASE

February 4, 2025

Emergency Water Service Interruption in University Park Area Due to Repairs

The City of Shreveport's Water & Sewerage Department is currently performing emergency repairs in the University Park area, resulting in a temporary water service interruption.

During construction work being performed by a contractor for an ongoing public works project, an unexpected impact to the water system occurred, requiring immediate repairs. Crews are on-site addressing the issue, and customers in the affected area should expect water service to be unavailable for approximately **2 to 5 hours** while repairs are completed.

The Water & Sewerage Department is working diligently to restore service as quickly as possible. We appreciate the patience and understanding of our residents as we make these necessary improvements to our city's infrastructure.

Residents are encouraged to check for updates from the department on the City of Shreveport's website and social media channels.
